LOCAL LEP SCALEUP PROGRAMMES

Cumbria is developing a programme for scaleups based on leadership development, investment, trade and export awareness. The LEP has been using existing data as a first step to discover suitable scaleup companies to target.

A significant part of this is to work with large corporations based in Cumbria to develop local supply chain knowledge, overcoming barriers to accessing new customers and markets at a local level, for scaleups.

Existing networks are being used as a knowledge transfer network and scaleups are invited to participate in this.

For further information and to see a complete list of visible scaleups, Scaleup Champions and Ambassadors visit us at www.scaleupinstitute.org.uk

SCALEUP VIEWS:

The key barriers to growth are access to talent and infrastructure, alongside UK markets and the right bank finance. They are looking for support from LEPs and Growth Hubs, alongside peer to peer networks.

Analysis by BVA BDRC from the Scaleup Survey 2018

TOP BARRIERS TO GROWTH:

Access to the talent you can hire who can do the jobs you have available

Access to markets and customers in the UK

Access to infrastructure/premises and broadband

Access to the right bank finance for the business (including debt finance, bank loans, credit cards, overdrafts)

WANT TO SEE MORE OF:

- Growth Hubs
- LEPs (Local Enterprise Partnerships)
- Peer to peer networks

WHAT'S NEXT/FUTURE PLANS: Look out for our developing scaleup programme in 2019.

These are programmes offered by the LEP and do not represent all the programmes offered to scaleups in the local area. These have not been evaluated or endorsed by the ScaleUp Institute for their impact and effectiveness. Data utilised at the top of this page is taken from the IDBR 2016. The confidentiality of all data held on the IDBR is protected by the National Statistics Code of Practice and associated Protocols and by specific legislation. In accordance with these requirements, data presented is rounded to prevent disclosure. Differences may exist in totals across tables due to disclosure methods used.
