

The Scaleup Index

2020

Foreword

2020 marks the publication of the fourth edition of the ScaleUp Index, the only report that examines all the UK's 'visible' scaleups in depth. Each year we seek to expand the analysis as part of **our commitment to improving the quality of data that is publicly available on the scaleup community** and this year is no different.

With the onset of the Covid pandemic in 2020 it has never been more important to understand who our scaleup growth champions are, as it is this community of **scaleups who with the right support, will drive the UK's economy forward in 2021 and beyond**. Despite everything, as an ecosystem we should be very encouraged by the good news that with the concerted efforts over the past five years **we have more scaleups breaking through the £10m+ turnover than ever before**. In 2020 we now have 7,474 visible scaleups - a 37% jump year on year, with 250 more listed on the London Stock Exchange's Alternative Investment Market (AIM). And pleasingly, **the number of female founded visible scaleups has doubled in a year**.

The Index continues to map the state of the UK's scaleups across sectors, geographies and more. In this year's edition we have found:

- The **overall number of visible scaleups has almost doubled** since we first published an Index in 2017 when we were able to identify 3,856 visible scaleups.
- For the first time we have been able to analyse scaling events and have found that on average, 40% of scaling events are based on headcount and turnover; 41% are just turnover; and 19% are just headcount.
- Visible scaleups are found **across sectors and across the UK** with notable scaleup clusters outside of London in Leeds, Birmingham, Manchester, Glasgow, Edinburgh and Cardiff.
- Visible **scaleups have shown resilience during the Covid-19 pandemic**, with almost 80% showing indications of moderate to positive impact. Even more positively, 1,048 scaleups (14%) have created job opportunities throughout the crisis.
- **£5.32b was invested into visible scaleups in 2019**.
- There were **20 deals worth more than £50m accounting for £3.82b (72%)** of the total invested amount.
- **BGF remains the top investor in visible scaleups** for the fourth year in a row, having made 124 investments worth £0.95bn since 2011, while Softbank has invested the greatest amount (£1.85bn over 4 deals).

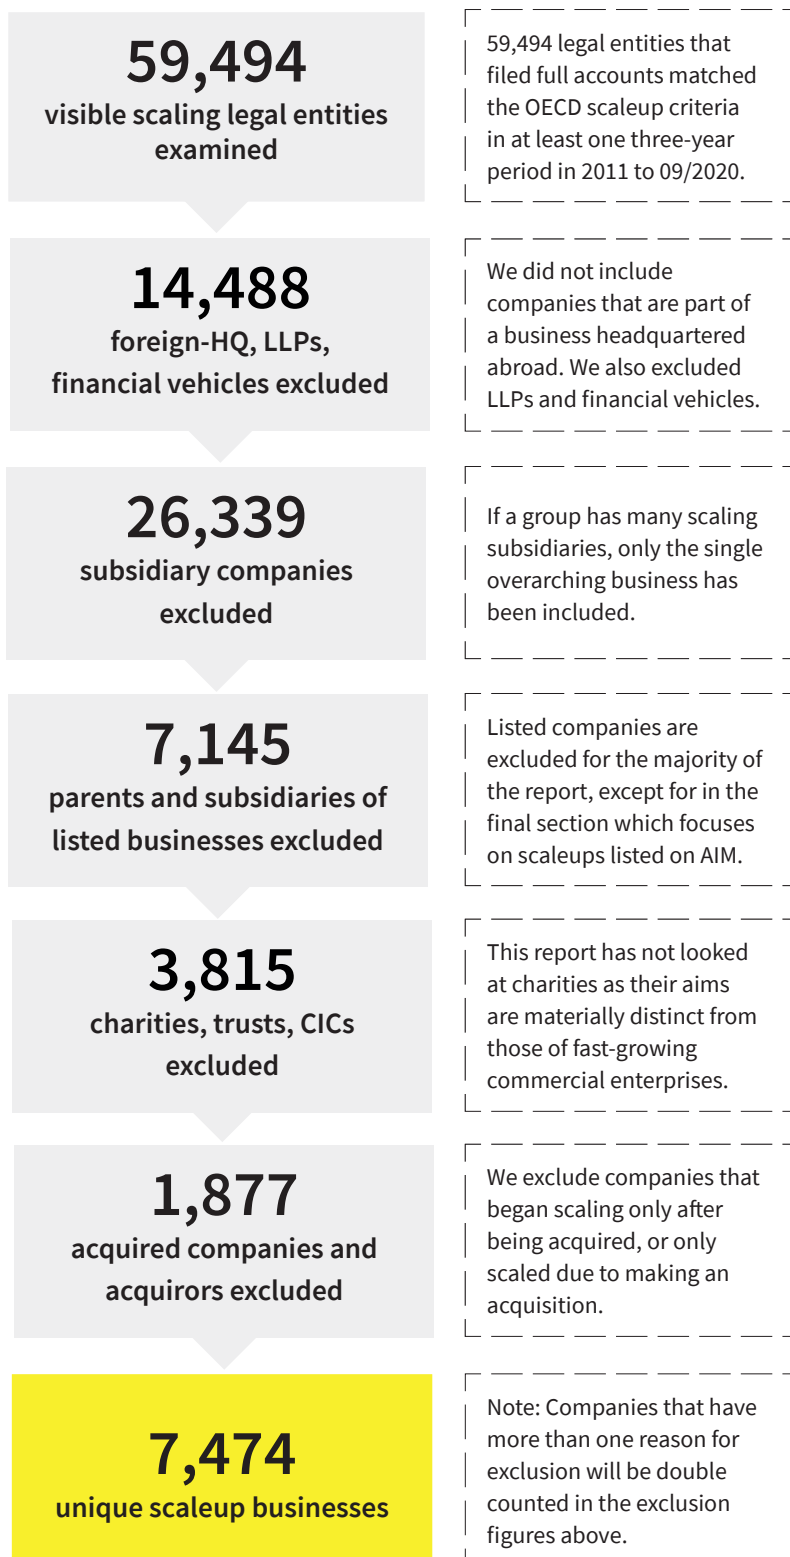

- The Index again reinforces the importance of Innovate UK grants to scaleups with £286m leveraging £5.2bn of private sector money, **highlighting the 'kitemark' effect Innovate UK has** in crowding in private sector backers to scaling businesses.
- **Nine new investors have entered the top 20 list** for investments into visible scaleups: Octopus Ventures, Notion Capital, Scottish Investment Bank, MMC Ventures, Parkwalk Opportunities EIS Fund, Passion Capital, Archangels, Cambridge Innovation Capital (CIC) and Angel CoFund.
- We have expanded our investor research to include business angels and networks given the key early stage role they play as investors in our scaling businesses. This report highlights their essential role with a significant **£2.4bn worth of investments made by angel investors** to these visible scaleups since 2011.
- The **Scottish angel syndicate Archangels is the top Angel investor** into visible scaleups, having made 22 investments into visible scaleups since 2011. This shows the impact of this model.
- **The total number of female founded visible scaleups has doubled in a year**. And 52% of scaleups have at least one female c-suite member, up from 48% in 2019.

The 2020 ScaleUp Index continues to show the breadth of the sectors these companies operate in; that they are scaling up and down the country; that they are more resilient to external shocks like the Covid-19 pandemic; and that they grow faster with the right kind of finance - whether it is private equity, public markets, or public sector grants. We must continue to support these companies because **their growth adds billions of pounds to the UK's economy and hundreds of thousands of jobs**. Getting more scaleups to a £10m+ threshold should be a constant goal for us as we move forward.

We are grateful for the continued support of our partners. Without this we would not be able to produce with Beauhurst such critical research that helps further the understanding of a vital segment of the economy.

IRENE GRAHAM
CEO, THE SCALEUP INSTITUTE

About this report

ABOUT THIS REPORT

This report examines ‘visible scaleups’ in the UK: a visible scaleup is a company that (i) meets the 20% OECD definition of a high-growth firm (see below) and (ii) files full accounts at Companies House.

OECD HIGH-GROWTH FIRMS

All enterprises with average annualised growth greater than 20% per annum, over a three year period, with at least 10 employees at the start of the observation are defined as high-growth firms. Growth can be measured by the number of employees or by turnover. Companies that have grown because of mergers, takeovers and acquisitions are excluded.

FULL ACCOUNTS

UK companies are only required to disclose their turnover if two of the following are true:

- annual turnover exceeds £10.2m
- assets exceed £5.1m
- more than 50 employees

Only companies that meet two or more of these criteria or those who have chosen to declare their turnover count as 20% visible scaleups.

We look forward to the fulfilment of current policy recommendations making ‘invisible scaleups’ discoverable too.

SECTORS

The businesses in this report have been classified according to Beauhurst’s proprietary sector matrix and are tagged with as many sectors as are relevant. In this report scaleups operating in multiple sectors have been double-counted.

ACKNOWLEDGEMENTS

We would like to thank the ScaleUp Institute for all of their support in the production of this report.

VISIBLE SCALEUPS

Types of scaling. On average, 40% of scaling events are based on headcount and turnover; 42% are just turnover; and 19% are just headcount.

AGE OF SCALEUPS AND TYPE OF SCALING ACHIEVED (1/11/2011 - 31/08/2020)

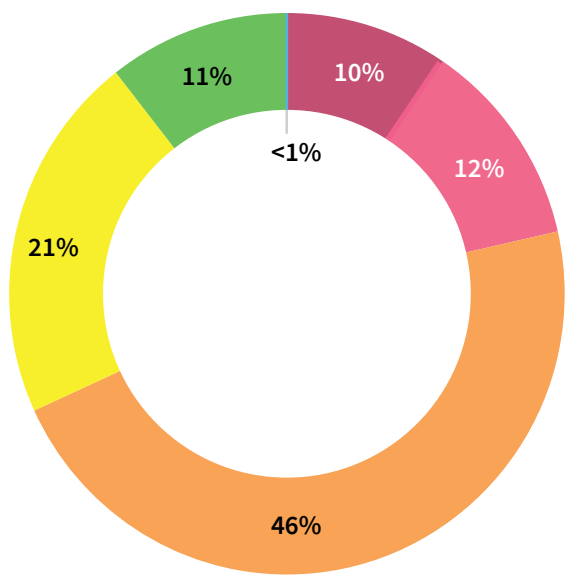

“Through our Goldman Sachs 10,000 Small Businesses UK program, we are proud to support the next generation of UK Scaleups and encouraged by their continuing success. Small businesses are vital to the economic recovery and as they navigate the challenges of COVID-19 it is more important than ever that entrepreneurs are supported to continue their growth journey.”

Charlotte Keenan
Head of the Office of Corporate International, Goldman Sachs

Scaleups facing COVID-19. Scaleups have shown resilience during the COVID-19 pandemic, with almost 80% indicating moderate to positive impact. Even more positively, 14% have created jobs throughout the crisis.

THE IMPACT OF COVID-19 ON SCALEUPS

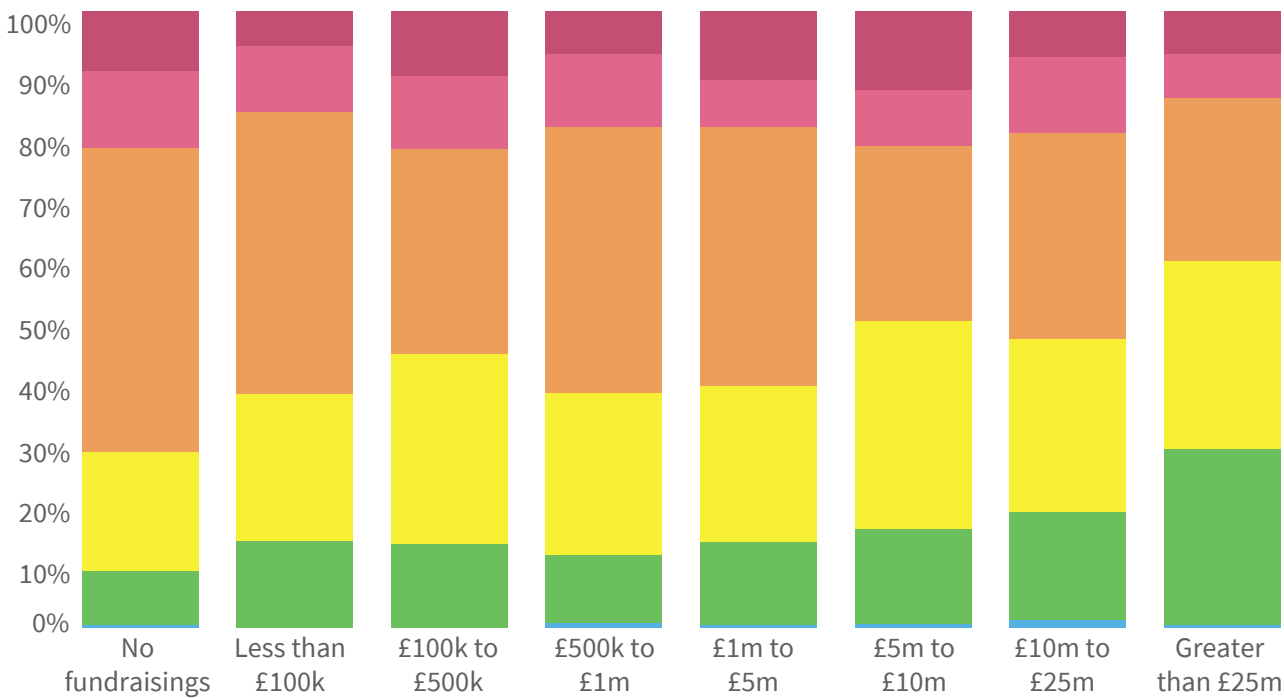

1,048 scaleups
creating job opportunities
throughout the crisis

0 scaleups
have ceased operations as of yet

COVID-19 IMPACT BY AMOUNT OF PRIVATE INVESTMENT RECEIVED

Beauhurst analysts have manually classified all visible scaleups based on the impact that Covid-19 is having on operations. Classifications are based on company websites, press coverage, social media and business model analysis.

Scaleups tackling 21st century challenges.

FINNEBROGUE Downpatrick, Northern Ireland

This County Down sausage and bacon producer is investing £25m in a new factory as part of a push into the plant-based food market. It is expected that the move will create 300 jobs, taking the company's headcount to 1,200 by the end of 2021. The Environment Secretary, George Eustice, has praised Finnebrogue's investment.

MAGTEC Sheffield, South Yorkshire, Yorkshire and The Humber

Founded in 1992, Magtec produces electric drive systems for a range of vehicle types, including off-road and military. In June, the business led a consortium of transport companies to win a £6m grant from the Advanced Propulsion Centre (APC) to support the creation of low-carbon transportation technologies. It is expected that the work will support another 65 employees at Magtec and an additional 165 across the region.

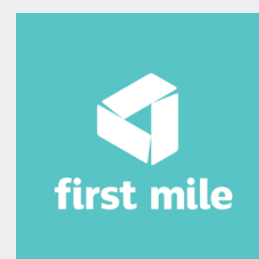

NAVENIO Oxford, South East

Co-founded by Professor Niki Trigoni (CTO) and Tim Weil (CEO), this scaleup tracks the location and path of people in indoor environments using machine learning and smartphone data. It has partnered with a number of NHS trusts to improve safety and efficiency in the face of Covid-19. In June, the company was awarded a £50,000 Innovate UK grant.

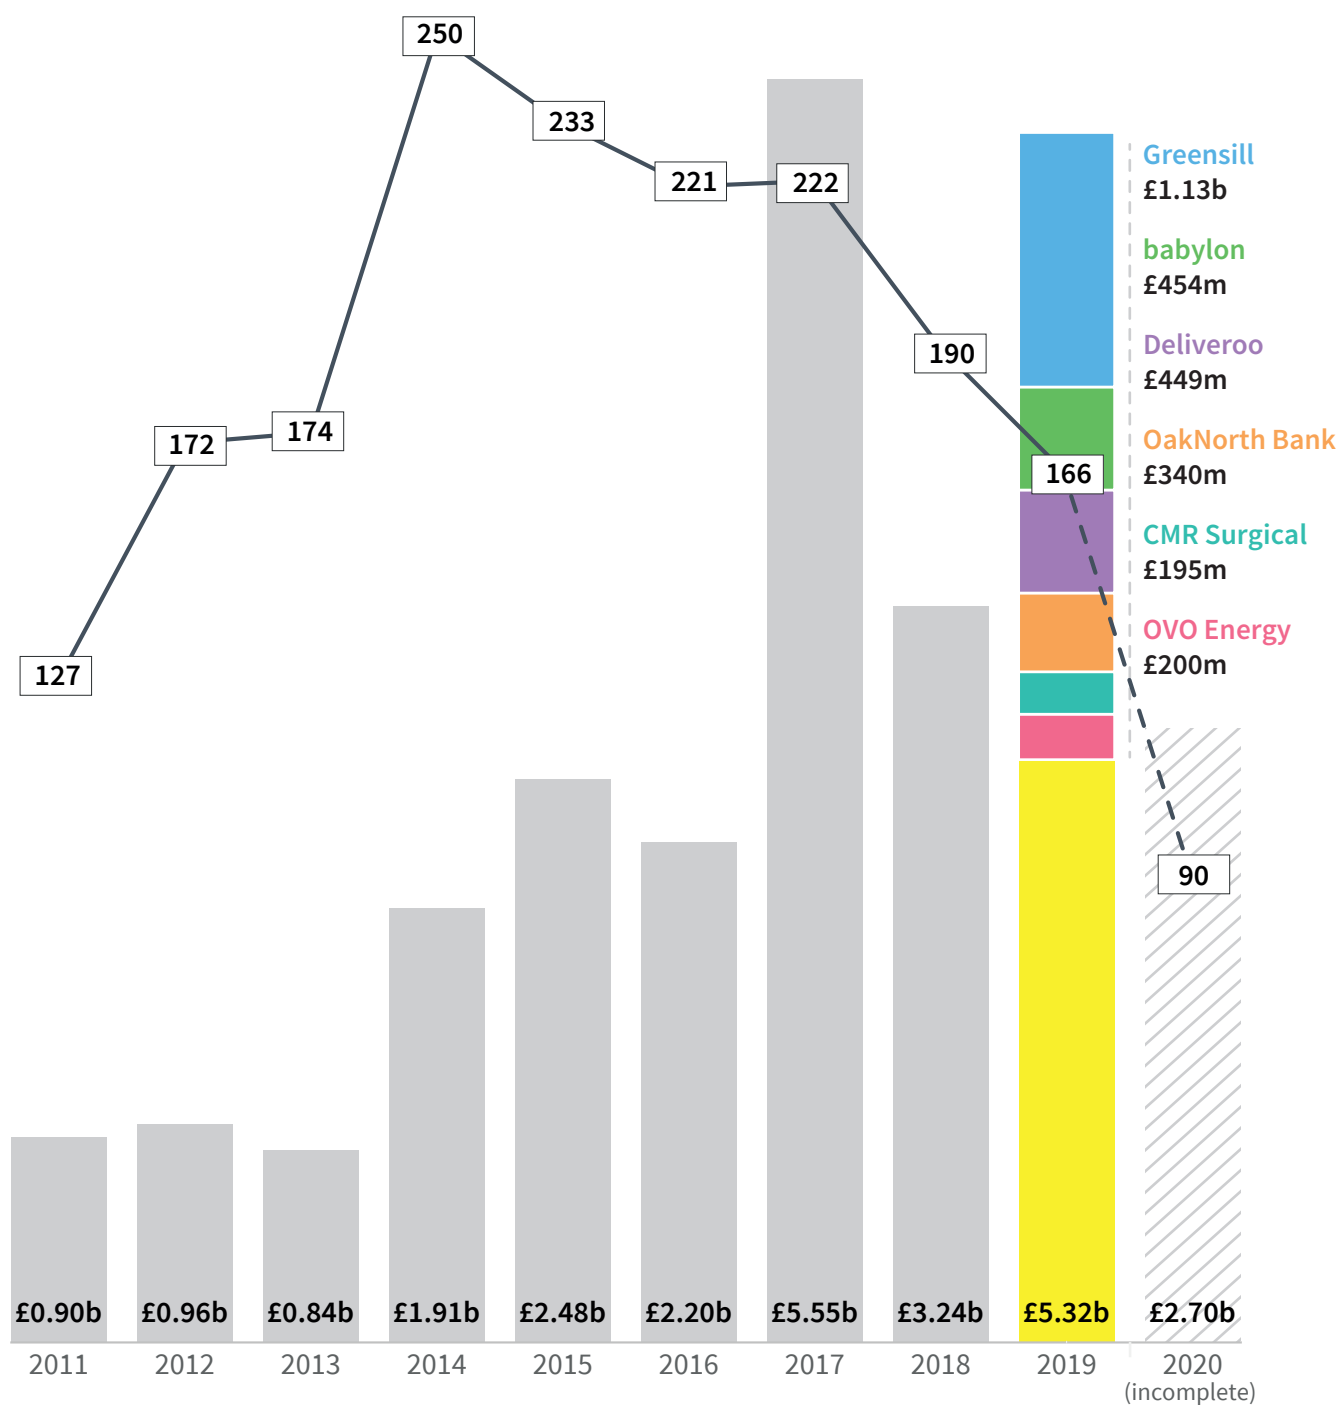

FIRST MILE Islington, London

First Mile is a waste recycling company, processing a variety of materials such as food, clothes and batteries. In July, the company launched a new personal protective equipment (PPE) waste disposal service to help organisations tackle the influx of Covid-19 related waste. Also in July, First Mile expanded its portfolio of London-based customers with the acquisition of waste and recycling collector Giraffe Recycling.

Investment. Despite a number of megadeals (£50m+), 2019 fell slightly short of the 2017 record for total equity investment into scaleups.

ANNOUNCED EQUITY INVESTMENTS IN SCALEUPS (1/1/11- 31/8/20)

166 announced equity investments were made into visible scaleups in 2019. The two largest deals were secured by Greensill, worth £615m and £511m.

“British Patient Capital has now committed over £1 billion across 42 investments in venture and venture growth capital funds. With over 500 innovative high-growth companies in the underlying portfolio, we are proud to be supporting so many entrepreneurs with the ambition to build successful, world-class business. It is encouraging to see that in this year’s ScaleUp Index, almost 75% of the funds backing scaleup businesses are invested in by the British Business Bank.”

Catherine Lewis La Torre,
CEO, British Business Bank

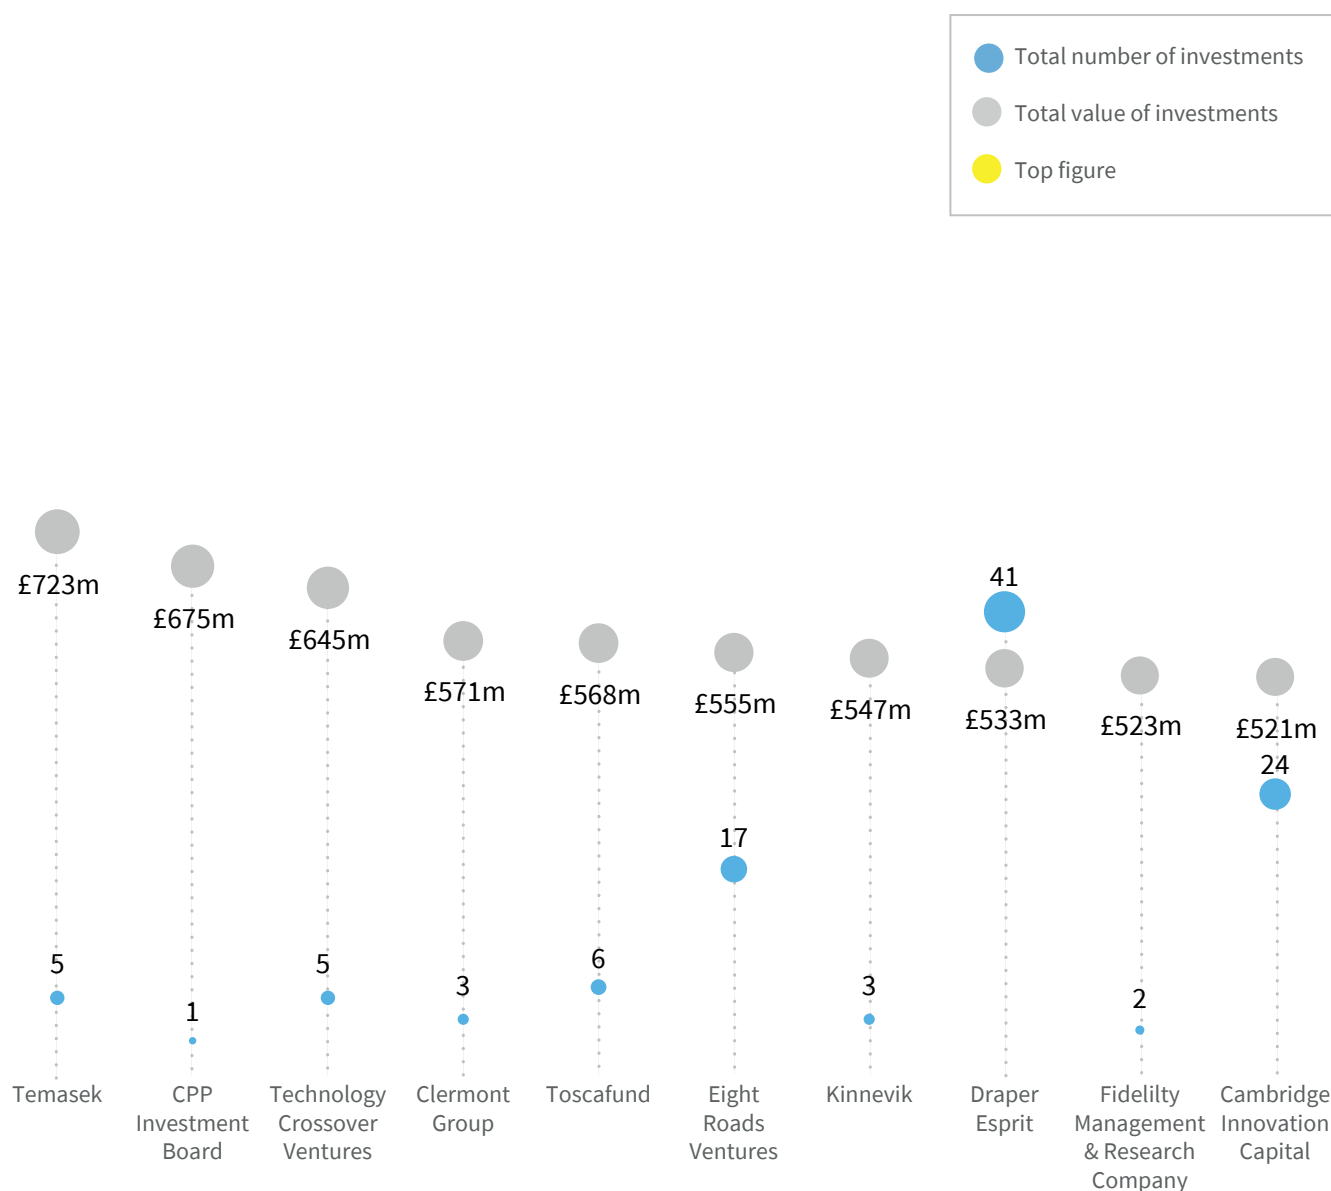

Top investors. With 124 deals, BGF remains the top investor into visible scaleups by number of investments. Softbank takes the top spot by amount invested with £1.85b spread over four deals.

TOP INVESTORS INTO SCALEUPS (1/1/11 – 31/8/20)

“ This is a very promising and timely report on the performance, growth and motivations of scaleups against the unprecedented backdrop and economic challenge of the global pandemic. The UK is one of the world leaders when it comes to innovation, discovery and creativity – but that potential can only be driven by supporting the country’s scaleups. We are proud not only to be the most prolific investor in these companies, but also to have continued to build momentum and maintain our investment run rate throughout the pandemic. This has been enabled by our regional and decentralised model, allowing us to deploy capital quickly into businesses who are continuing on their growth journey. However, the UK urgently needs more equity capital if we are to drive the future growth of scaleups at large, and the economy more broadly.”

Stephen Welton
Executive Chair, BGF

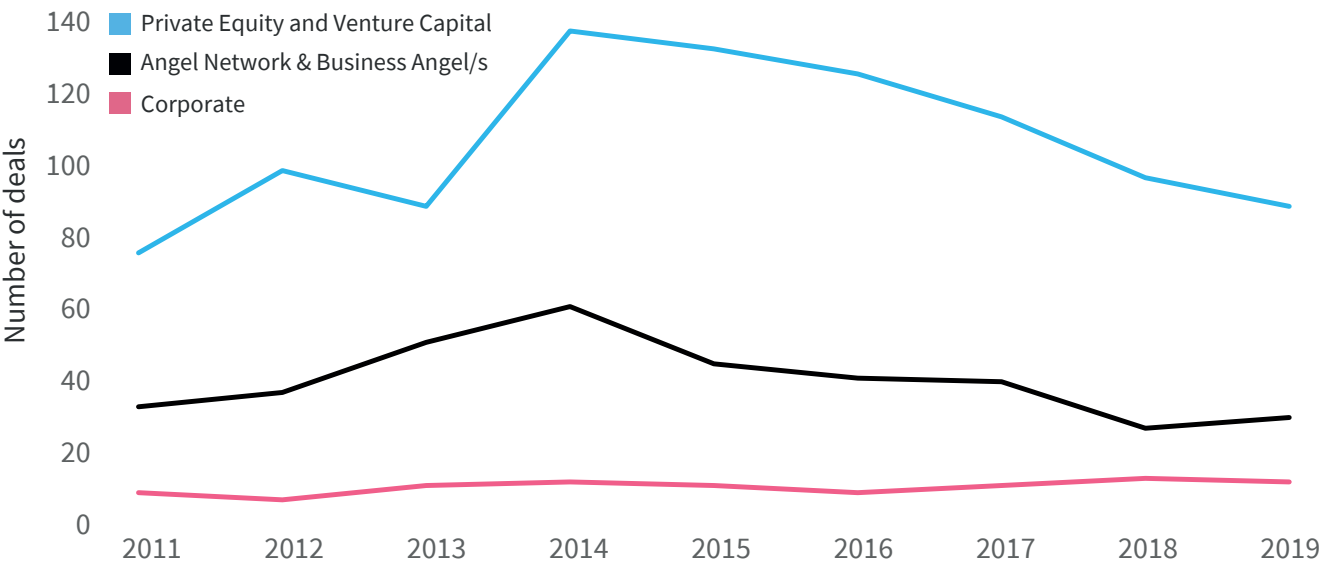

Investor type. Scaleups use a range of private equity finance options, dominated by venture capital and angels.

TOP PRIVATE INVESTOR TYPES BY THE NUMBER OF ANNOUNCED DEALS INTO SCALEUPS (1/11/2011 - 31/08/2020)

Angel Networks & Business Angel(s)	387
Corporate	118

ANNOUNCED DEAL NUMBERS BY TOP PRIVATE INVESTOR TYPES (1/1/11 - 31/08/2020)

“ This year’s ScaleUp Index has identified the vital role that Business Angels have been playing in bringing both early stage equity and business experience to a significant number of the UK’s scaleups. Many of the Angel groups in our community have been specifically identified as making a considerable number of investments into businesses on their scale up journey, with Archangels topping the list with 22 deals into scale ups since 2011. This clearly shows the importance of angels and the need to increase the capacity of the Angel investment community to enable many more scaling businesses to benefit from early stage equity in all parts of the UK.”

Jenny Tooth OBE
CEO of UK Business Angels Association

Angel investors. Scottish angel syndicate Archangels tops the ranking with 22 investments into scaleups since 2011.

NOTE:

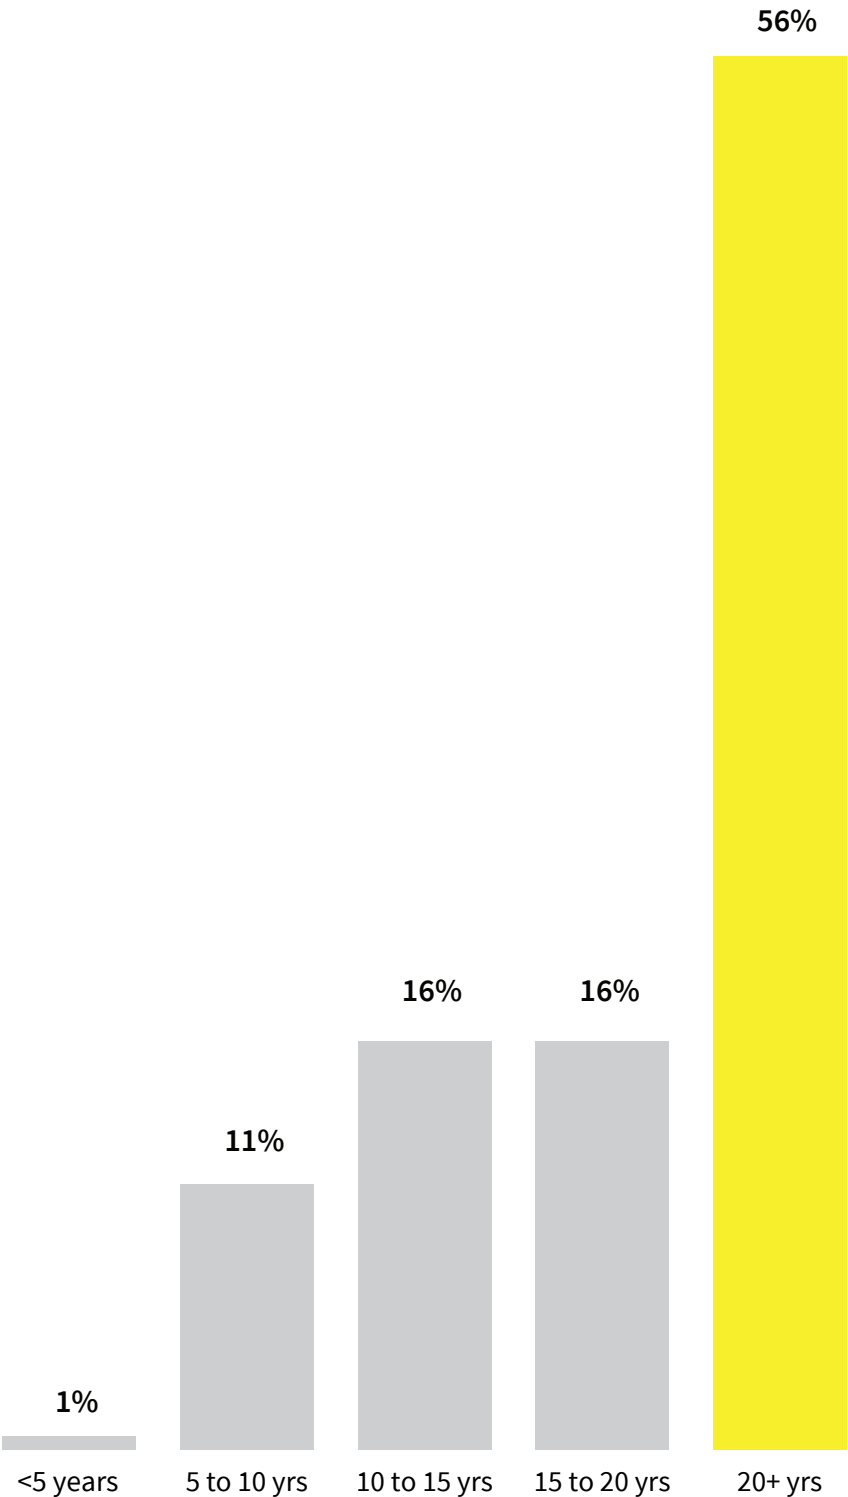

Innovate UK also offers innovation loans for SMEs. A total of up to £50 million has been committed in five initial competitions and a further two competitions will make £25 million available for business innovation projects.

“ We welcome all the findings in this years ScaleUp Index report and it is especially welcoming to see that this year despite the conditions brought about by the Coronavirus pandemic we have a 37% increase in scaleup companies over the previous year and that we are just shy of 7,500 visible scaleups in the UK. Especially welcome is that female founding scaleups have doubled this year, this is something to celebrate and follows closely the effect we have seen through Innovate UK’s Women in Business programme. Regionally we now have much more representation from scaleup clusters outside of London including clusters in the Devolved Nations.”

Simon Edmonds
Deputy Executive Chair and Chief Business Officer, Innovate UK

Company ages. Companies incorporated more than 15 years ago make up 72% of the scaleup population.

PROPORTION OF VISIBLE SCALEUPS BY AGE

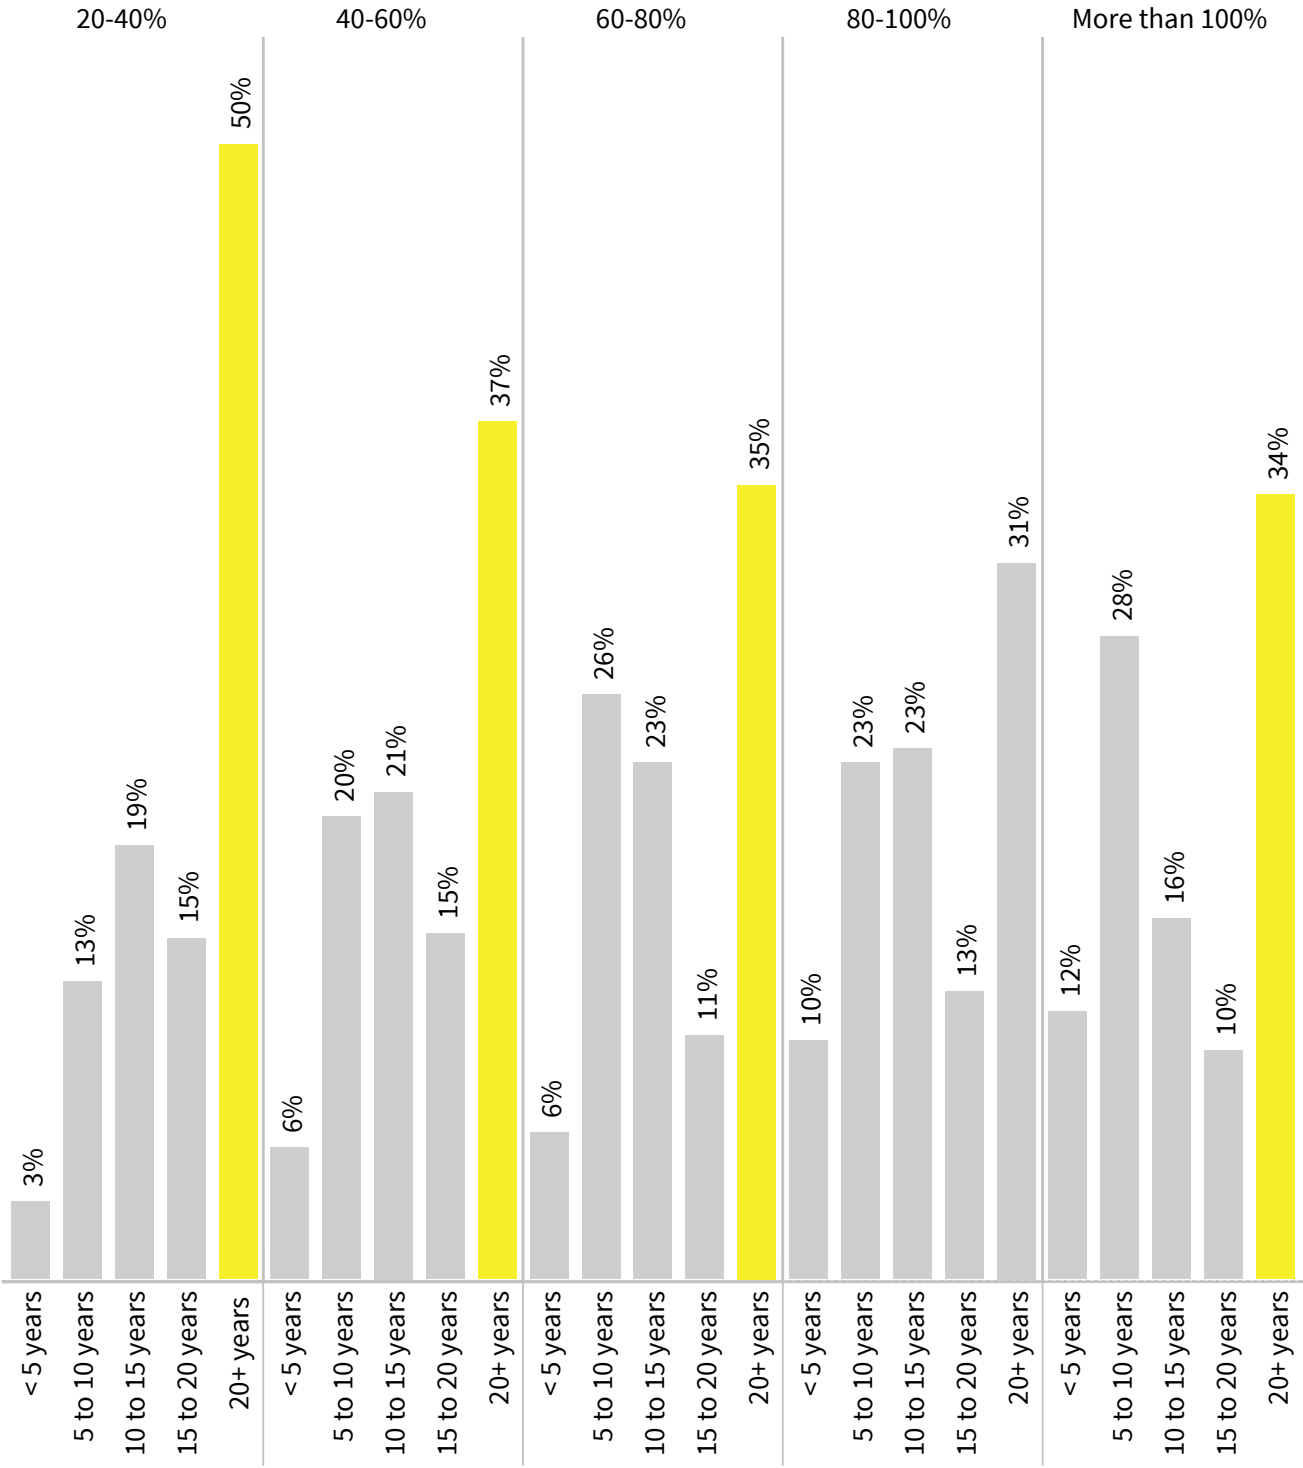

“ The majority of visible scaleups have been trading for 20 years or more. 86% of these older businesses achieved scaling without the external investment available to the youngest generation of high-growth companies (p. 25). While an impressive achievement, this also alludes to an exciting future for scaleups, enabled by the increasing availability of public and private investment in the UK. We expect to see more scaleups and increasing growth among them, both for the emerging cohort of growing companies who will soon reach the £10+ turnover visibility threshold, as well as for older companies that may be fundraising for the first time.”

Ava Scott
Research and Consultancy
Associate, Beauhurst

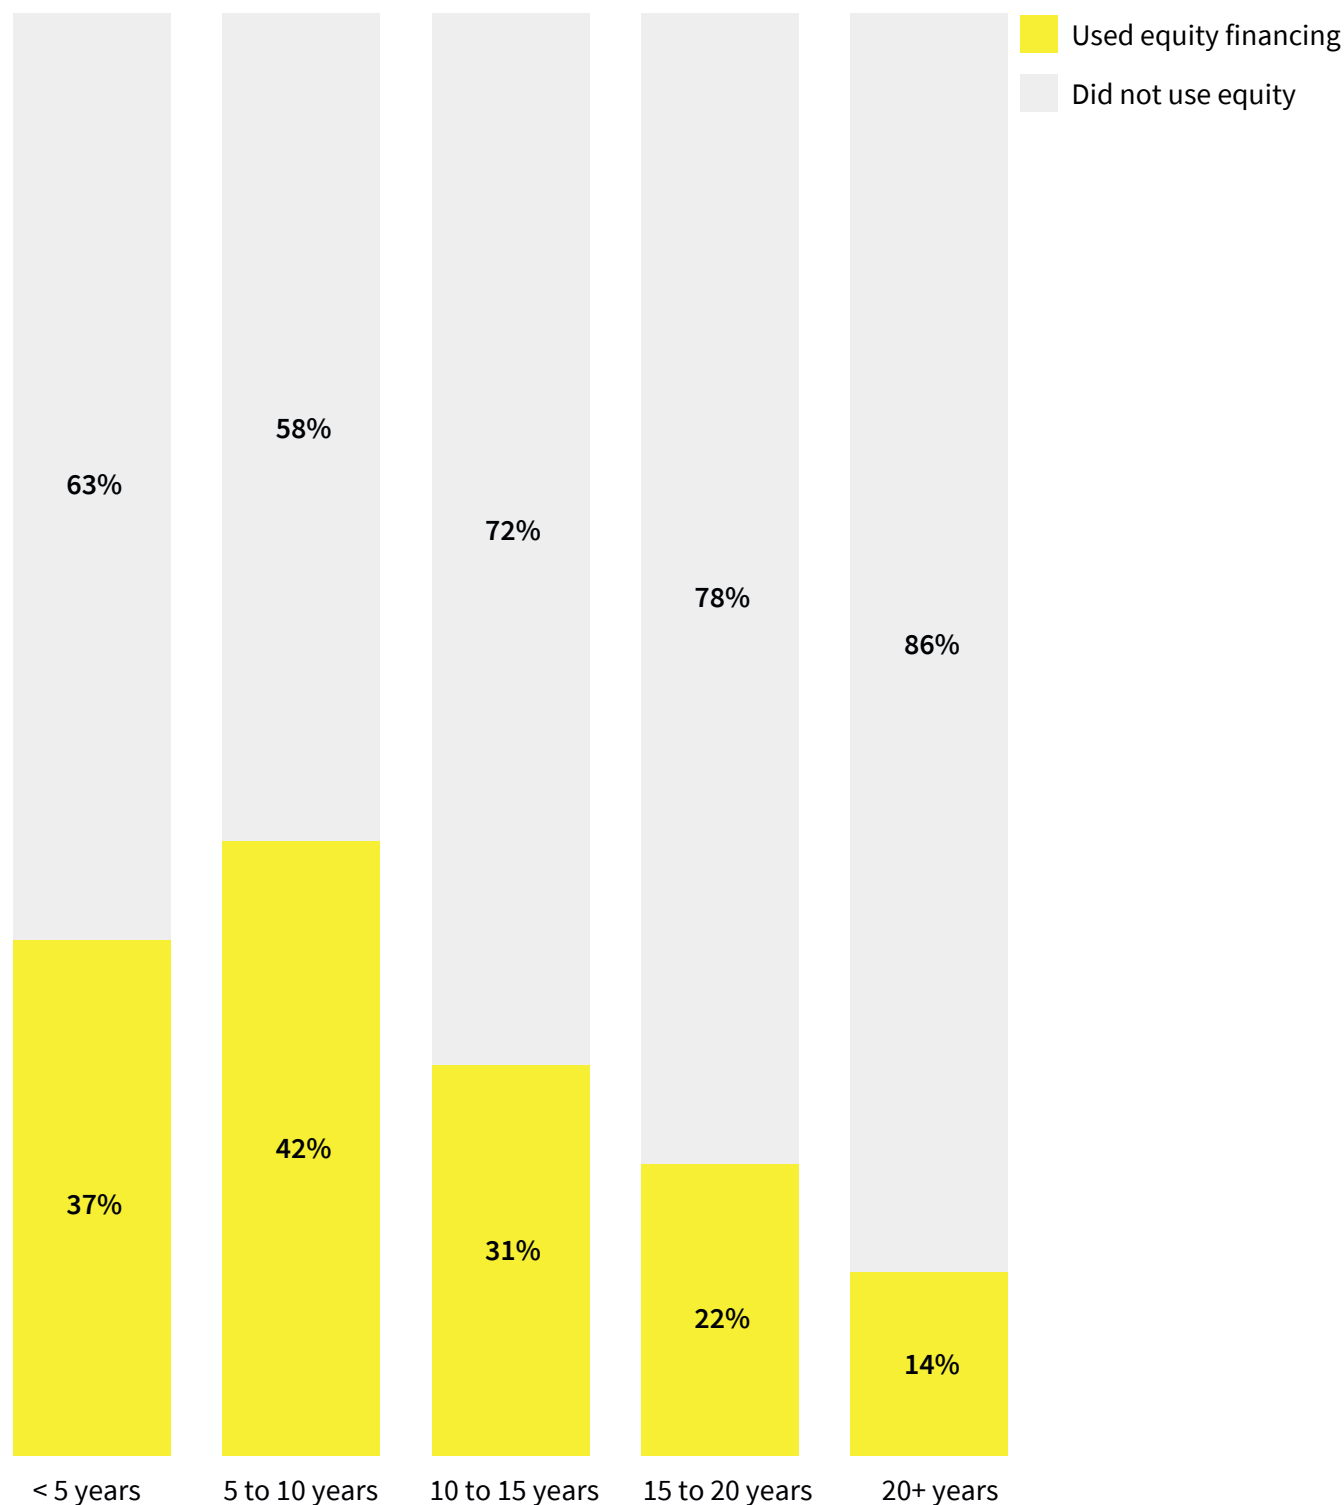

Growth by age. Companies more than 20 years old are most likely to have turnover growth rates of over 100%.

AVERAGE TURNOVER GROWTH RATE BY AGE OF COMPANY

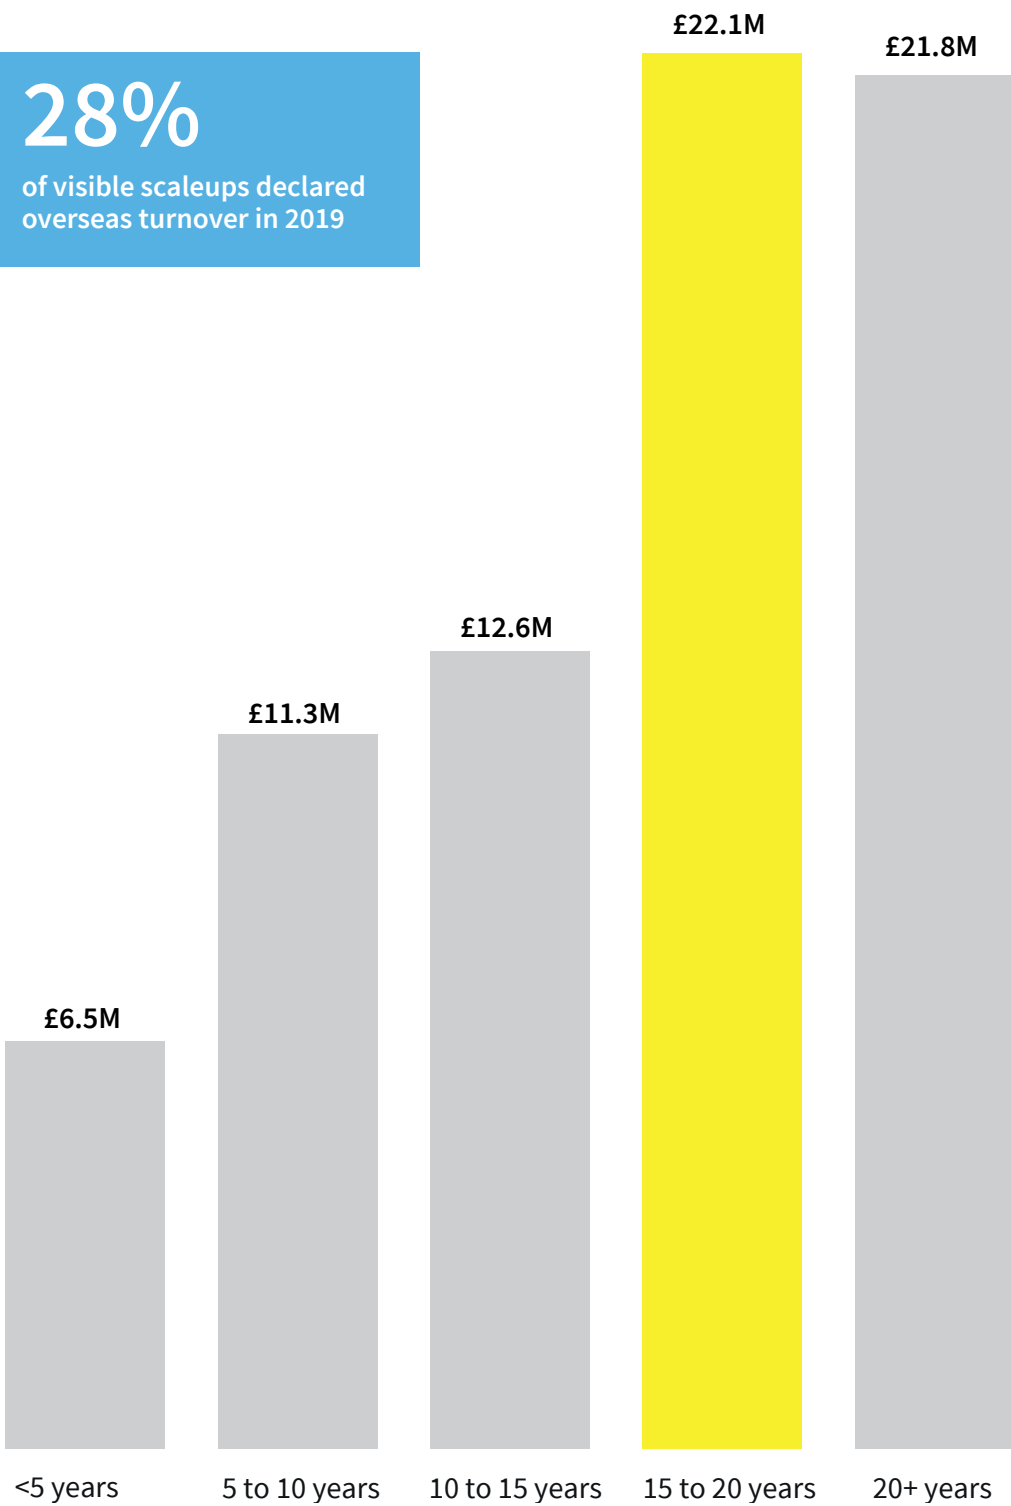

Equity by age. Older scaleups are the least likely to use equity finance. Introducing new shareholders becomes more difficult over time.

PROPORTION OF SCALEUPS USING EQUITY FINANCING BY COMPANY AGE

Exports by age. Nearly a third of scaleups declare overseas turnover. Scaleups that are more than 15 years old have the highest average overseas turnover.

AVERAGE OVERSEAS TURNOVER BY SCALEUPS IN 2019

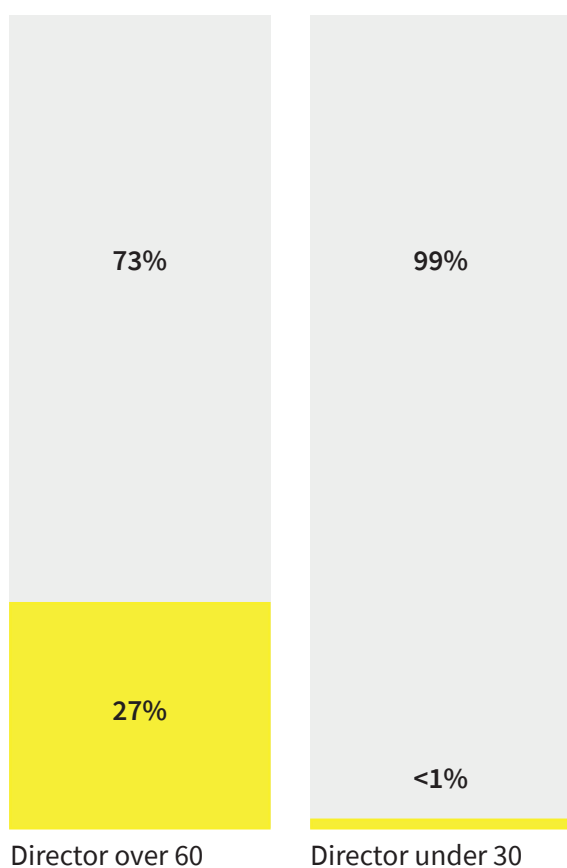

People: Age 72% of directors are between 30 and 60 years old.

53

average age of scaleup directors

AGE OF DIRECTORS AT VISIBLE SCALEUPS

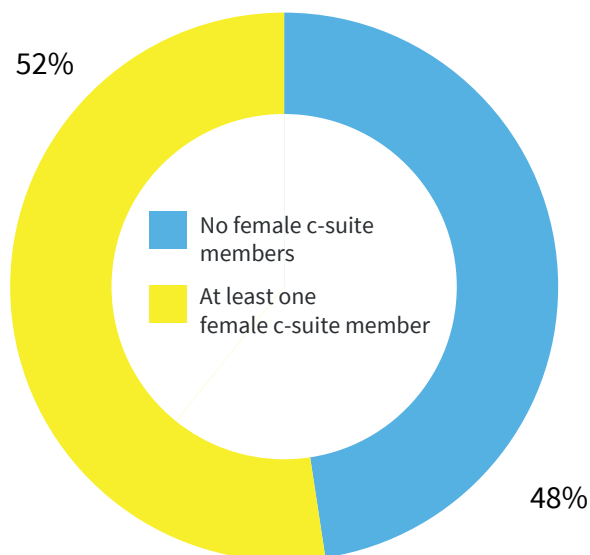

“It’s been a tough year for all and yet I could not be more encouraged at the resilience of our scaleup companies or the ambitious tenacity of our SME community. Growth capital is available to the innovator, and on that note we’ve seen more and more rapid transitions from Series A to Series B funding rounds. It’s a very impressive performance all round that, despite the challenges of 2020, the number of scale-ups in this country is rising considerably, including poignantly those listed on AIM. Indeed, after completing AIM’s two largest IPOs this year we’re seeing AIM is proving a haven for high growth companies with ambitions to list publicly. I’m also particularly pleased that the number of female-founded scale-ups has doubled. At finnCap, through Ambition Nation, we continue to champion and support female leaders in business. We also recognise that environmental, societal and governance commitments are central to all scaleup investment decisions as we move forward and, with the help of our new ESG handbook and scorecard, we are dedicated to delivering our clients’ ambitions for a sustainable future.”

Sam Smith
CEO, finnCap Group Plc

People: Gender Female representation at the C-suite level and in directorships is improving, although founders remain predominantly male.

VISIBLE SCALEUPS WITH AT LEAST ONE FEMALE C-SUITE MEMBER

“ This year saw Technology widen its new lead on Retail as the fourth-most represented top-level sector by number of visible scaleups (p. 39). SaaS businesses accounted for just under 25% of all the technology scaleups with internet platforms and other software businesses also dominant (p. 43). As more technology companies reach sizes where their revenues become visible, it will be interesting to see whether this sector can displace the established top three and come to dominate the UK’s scaleup population. Policymakers and investors need to start considering what ramifications the rise of technology scaleups will have for the UK economy.”

Daniel Robinson
Research and Consultancy Associate, Beauhurst

Top technology sectors. The top sector for Technology scaleups is Software-as-a-service (SaaS), followed by Internet platforms by a considerable margin.

TOP TECHNOLOGY AND IP-BASED SECTORS BY NUMBER OF SCALEUPS

AIM Scaleups. Despite a decrease in the overall number of companies listed on AIM, the number of scaleups has increased from last year.

825
unique companies
listed on AIM

AIM typically attracts smaller companies than the main London Stock Exchange. 825 companies were listed on it at the time of analysis.

645
companies incorporated
in the UK

Companies from outside the UK can list on AIM if they meet the requirements. This analysis only looks at UK-incorporated companies.

474
unique scaleup
companies

Companies require at least four years of annual accounts with sales or number of employees to determine scaling status.

224
foreign operating and
financial vehicles excluded

Companies operating outside the UK and investment vehicles were excluded.

250
unique AIM scaleups

“ This year it is more important than ever to recognise the contribution that scaling companies make to the UK economy as highlighted by the findings contained in the 2020 ScaleUp Index. As AIM celebrates its 25th anniversary, the data contained in the Index reinforces the important role that AIM plays in providing equity finance to ambitious companies. Already this year over £4.2bn has been raised on AIM by companies conducting IPOs and further issues and London Stock Exchange remains committed to ensuring that these companies have long term access to the equity capital and support they need to grow their businesses.”

Marcus Stuttard
Head of AIM & UK Primary Markets, London Stock Exchange

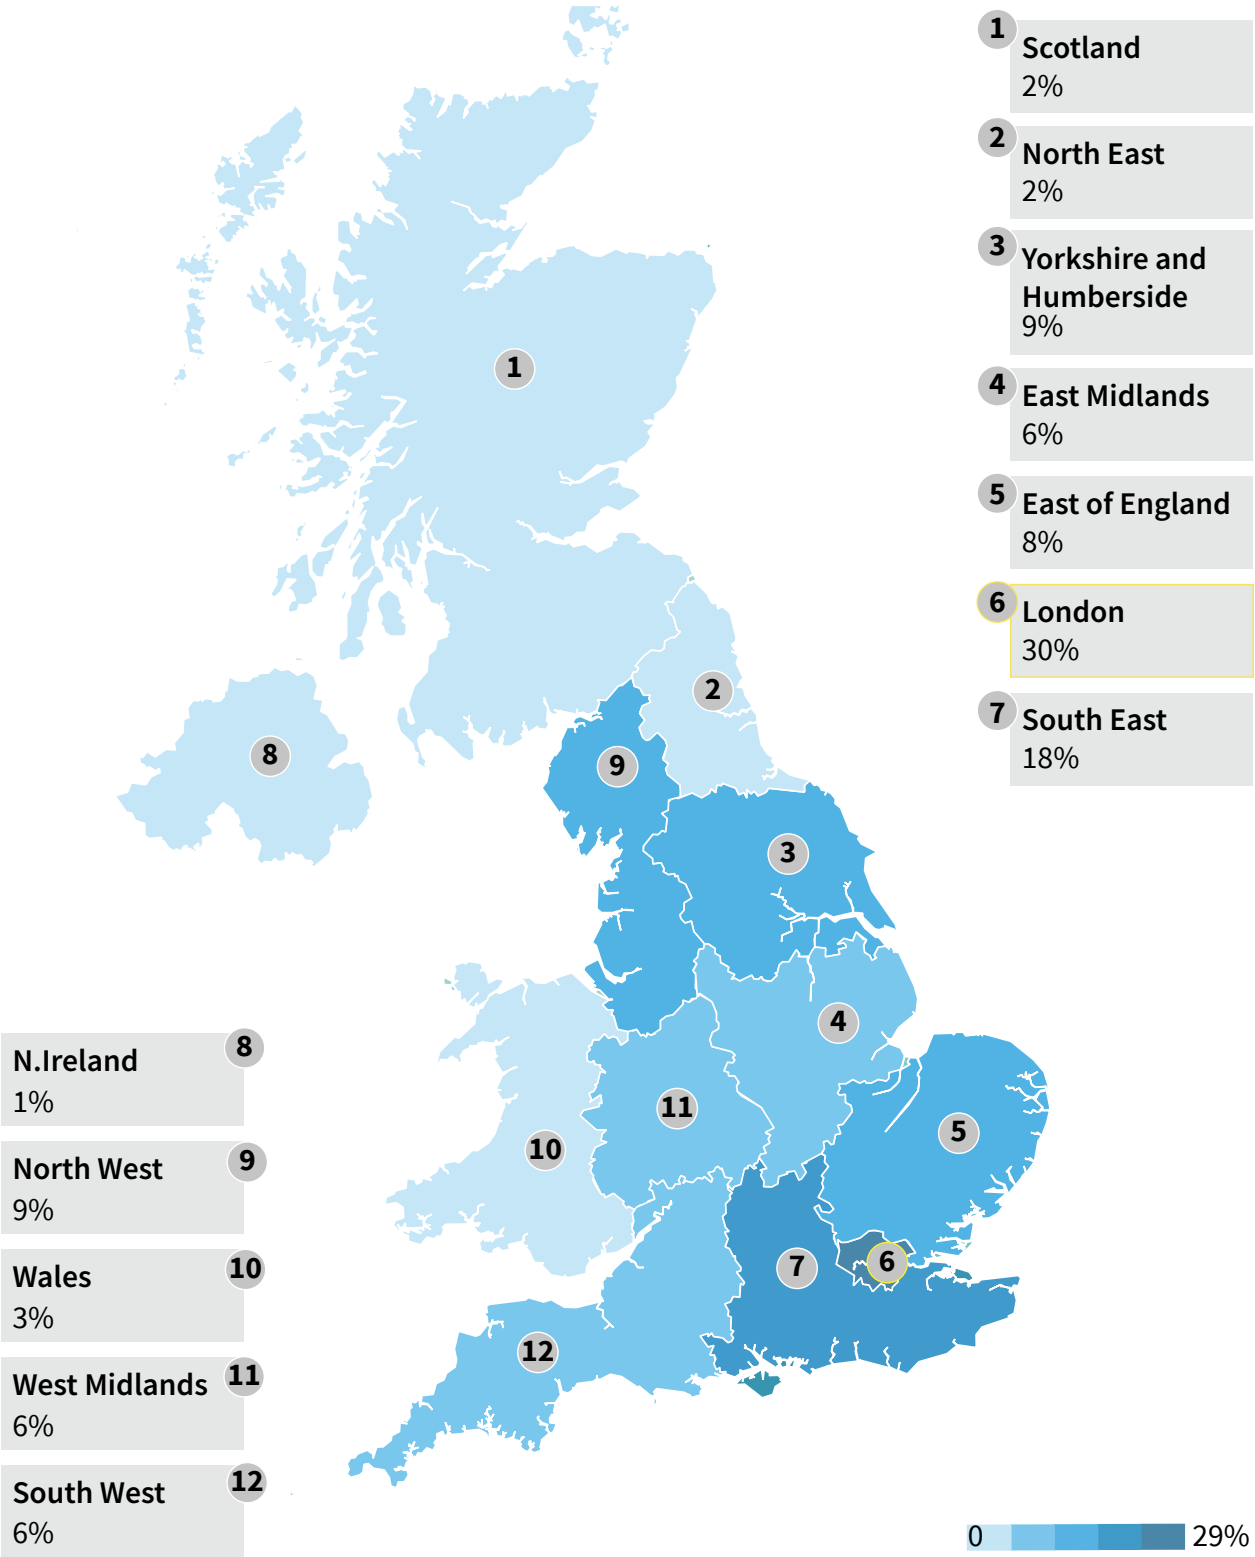

Companies delivering services for other businesses are the most common among AIM scaleups. Companies developing software technology also occur frequently.

TOP SECTORS BY NUMBER OF AIM SCALEUPS

Business and professional services for businesses	14
Other software	8
Business banking and financial services	6
Analytics, insight, tools	5
Software-as-a-service (SAAS)	5
Online games publishing	4
Automotive	4
Mobile apps	4
Other manufacturing and engineering	3
IT consultancy services	4
Property/land development and construction	4
Recruitment agencies and personnel supply services	4

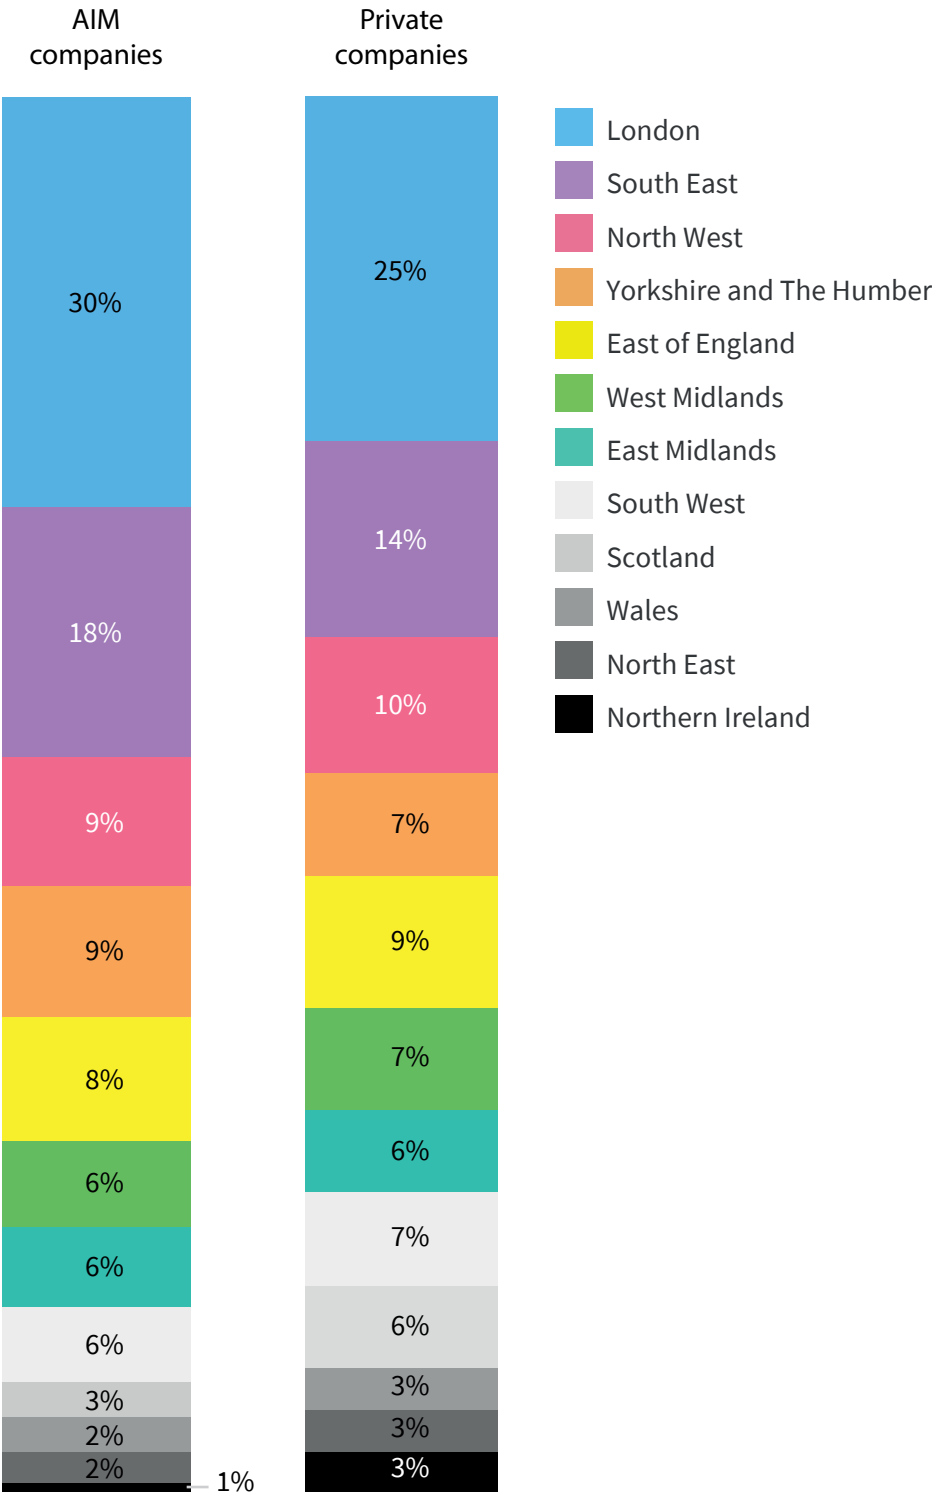

London and the South East account for almost half of AIM scaleups. The North West and Yorkshire and The Humber are the third most populated, home to 9% each.

NUMBER OF AIM SCALEUPS MAPPED BY REGION

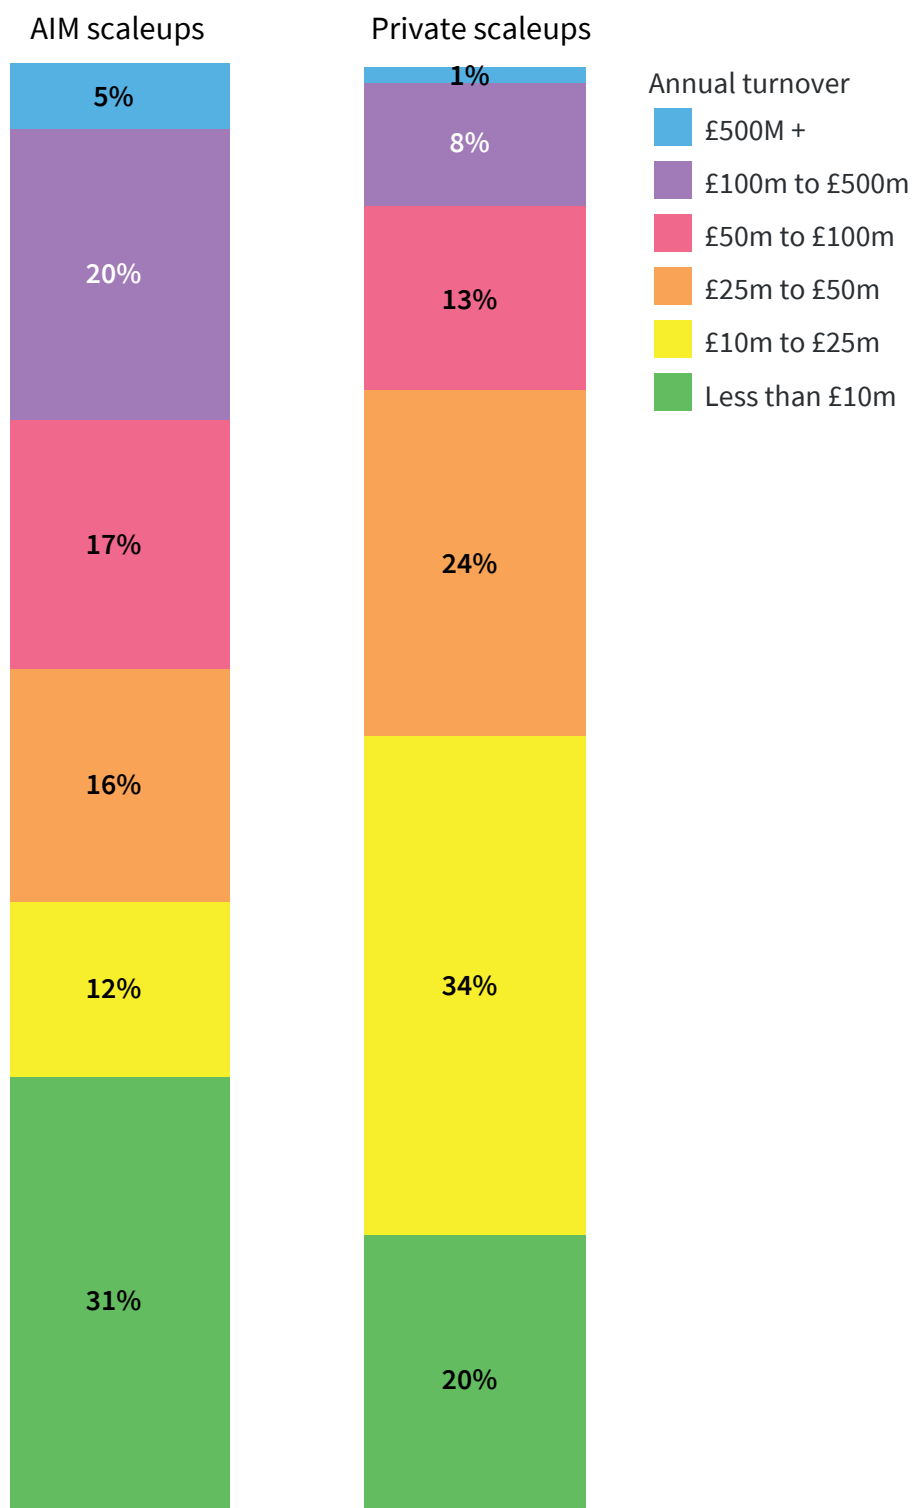

Scaleups listed on AIM are more likely to be found in London and the South East than the wider scaleup population.

NUMBER OF AIM SCALEUPS AND PRIVATE SCALEUPS BY REGION

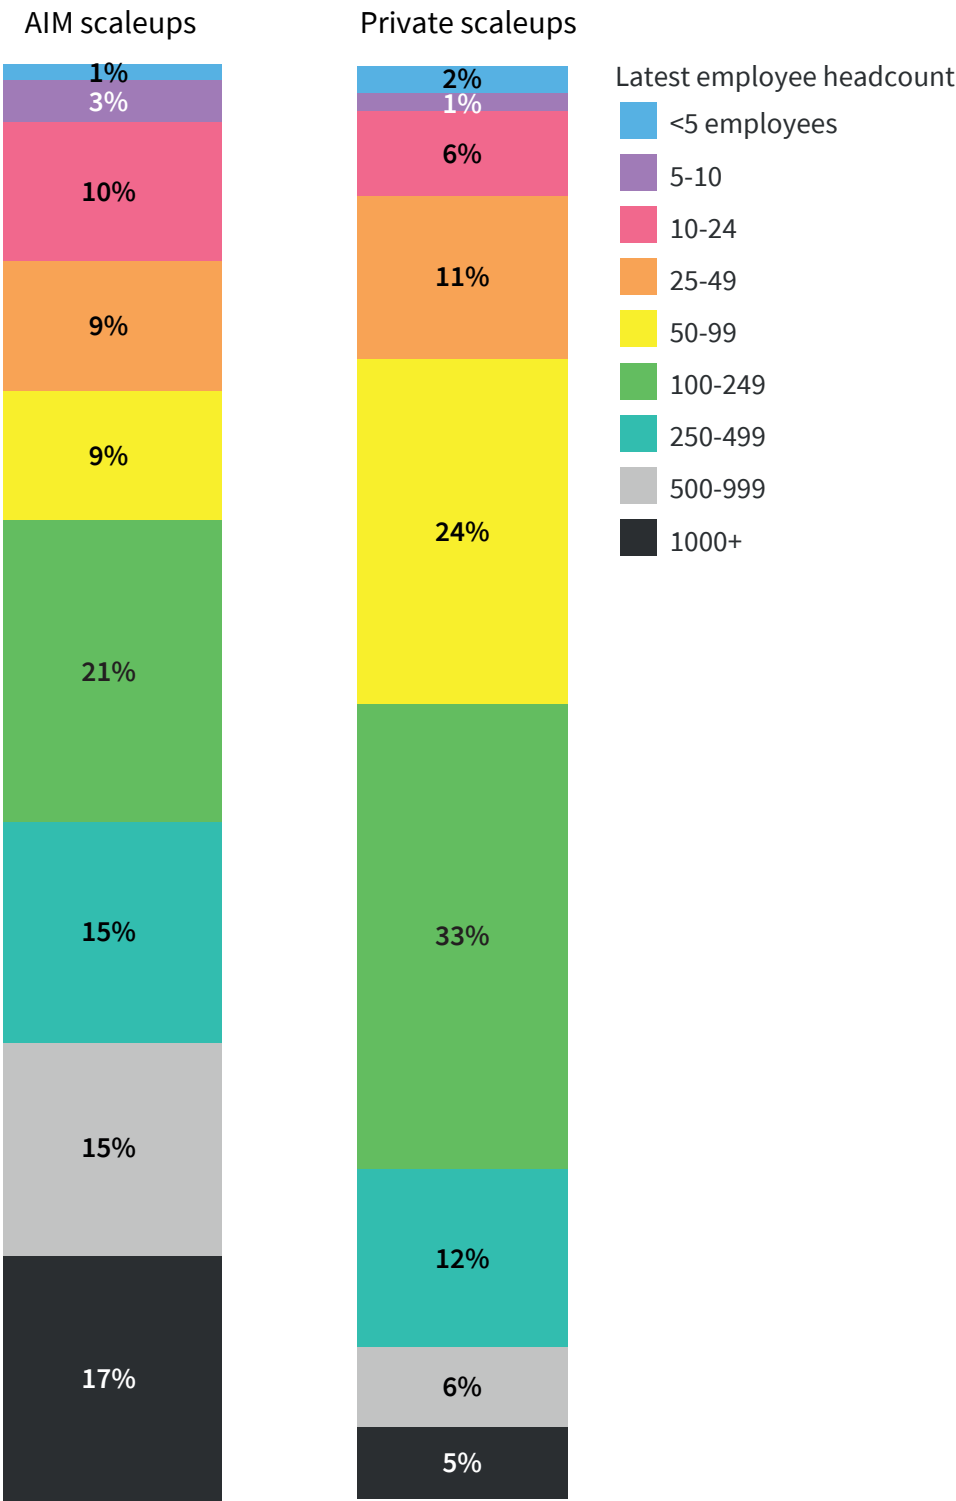

AIM scaleups have a wider spread of turnover than private scaleups, with more companies bringing in more than £500m or less than £10m.

TURNOVER SIZE OF AIM SCALEUPS COMPARED WITH PRIVATE SCALEUPS (2019)

AIM scaleups tend to have more employees than private scaleups. Companies with 250 or more employees make up 47% of AIM scaleups, and 23% of private scaleups.

About the authors.

Beauhurst

Beauhurst is a searchable database of the UK's high-growth companies.

Our platform is trusted by thousands of business professionals to help them find, research and monitor the most ambitious businesses in Britain. We collect data on every company that meets our unique criteria of high-growth; from equity-backed startups to accelerator attendees, academic spinouts and fast-growing scaleups.

Our data is also used by journalists and researchers who seek to understand the high-growth economy, and powering studies by major organisations – including the British Business Bank, HM Treasury and Innovate UK – to help them develop effective policy.

For more information and a free demonstration, visit beauhurst.com

The ScaleUp Institute builds on the pioneering research and recommendations published in the 2014 Scale-Up Report. The Institute collaborates with policy makers, corporate partners and educational establishments to take these recommendations forward, to track the targets set out in the report, and to make a real and identifiable impact.

We aim to advance understanding of how to scale up a business, and how to build the most effective environment in which scaleups can flourish. We spread best practice, providing opportunities for scaleup companies across industry sectors and regions to meet and share ideas. We undertake research, thought leadership and targeted projects with partners.

We work with policy makers to identify opportunities that will support scaleup businesses. We share our methodology and ideas to create resources that will help aspiring scaleup businesses. We keep scaleups and their issues at the top of the UK political and business agenda.
